Vaibhav Singh Bains

Jaipur, Rajasthan | +918959667282 | vaibhavvst8@gmail.com | vaibhavvst24 | Vaibhav Singh

Summary

Motivated and detail-oriented individual with practical experience in python programming, data analysis, and machine learning. Skilled in implementing data-driven solutions through academic and personal projects. Passionate about applying technology to solve real-world challenges.

Education

Global Institute of Technology — **2021 - 2025**
Jaipur, Rajasthan — B.Tech (AI & DS)
7.5 CGPA

Springwood School — **2021**
Neemuch, Madhya Pradesh — Senior Secondary
75.8

Springwood School — **2019**
Neemuch, Madhya Pradesh — Secondary
71.7

Courses

Python with Data Science & Machine Learning — **2024-2025**
Grras Solutions pvt Ltd — Jaipur, Rajasthan

System Admin & AWS Training — **2024 - 2025**
Grras Solutions Pvt Ltd — Jaipur, Rajasthan

Skills

Programming Languages
Python, SQL

Data Visualization
Matplotlib, Plotly, Power BI

Machine Learning
Scikit-Learn, Tensorflow

Data Science
Pandas, Numpy, Seaborn, Flask

Framework & Tools
Flask, VMware, VS Code, GitHub

Data Analysis & Manipulation
Exploratory Data Analysis (EDA), Data Cleaning

Cloud & OS
AWS Cloud, Windows

Database
MySQL

Projects

House Price Prediction - Regression — **January 2025 - February 2025**
https://github.com/vaibhavvst24/House-Price-Prediction

- Developed a predictive model using Random Forest Regressor to estimate house prices based on key features like income, population, and location.
- Evaluated model performance using MAE, MSE, RMSE, and R^2 Score to ensure high accuracy.
- Integrated trained ML model into the Flask app and deployed using Joblib for seamless user interaction.
- Visualized insights using Seaborn and Matplotlib to analyze feature importance and correlation
- Achieved over **88%** training accuracy and **81%** testing accuracy with the Random Forest model slight overfitting but reasonable for real world data.

Cricket World Cup 2023 Data Analysis — **December 2024 - January 2025**
https://github.com/vaibhavvst24/Data-Analysis-CWC-23

- Developed an interactive web application using Flask to present analytical insights from the 2023 Cricket World Cup, integrating data visualizations with custom HTML/CSS front-end design.
- Analyzed match-wise data from the 2023 ICC Cricket World Cup to uncover team performance patterns, player contributions, and winning strategies.
- Performed statistical comparisons such as batting first vs fielding first win rates, toss impact, and run rate trends to derive actionable insights.
- Visualized key metrics including win/loss ratios, highest team scores, extras contribution, and boundary counts using charts, maps, and drill-down tables.

Certifications

Python Programming — **March 2025**
Grras Solutions Pvt Ltd

ICDSEA 2025 — **April 2025**
Global Institute of Technology

Achievements

Code Red 3.0 Triathalon — **October 2023**
Vivekanand Global University

Volunteering

Kukdukoo Fest — **December 2022**
Volunteer
